

Oracle Database Security: Detective Controls Ed 1

Duration: 5 Days

What you will learn

In the Oracle Database Security: Detective Controls course, students learn how they can use Oracle Database administration auditing features to meet the compliance requirements of their organization. The current regulatory environment requires better security at the database level. Students learn how to audit the access to their databases and how to use the auditing and compliance features to monitor data access and confidentiality. The course provides suggested Oracle solutions for common problems.

Learn To:

Enumerate Oracle auditing solutions to monitor database security requirements.

Implement Oracle Audit Vault and Oracle Database Firewall.

Configure Oracle Audit Vault and Oracle Database Firewall.

Explain Oracle Compliance Framework.

Configure basic Compliance Framework rules.

Benefits To You

Students will benefit by learning about the following security features of the database: Oracle Audit Vault, Oracle Database Firewall and Oracle Compliance Framework.

Hands-on practices and available demonstrations help students learn how to use detective control features of Oracle Database 12c to audit their database access using Oracle Enterprise Manager Cloud Control or other simple tools like SQL*Plus.

Audience

Database Administrators

Security Administrators

Security Compliance Professionals

System Analysts

Related Training

Required Prerequisites

Create PL/SQL procedures

Good knowledge of Oracle Database Administration

Good understanding of SQL

Introduction to Oracle Database Security Ed 1

Suggested Prerequisites

Create and manage database users, roles, and privilege

Oracle Database 12c R2: Administration Workshop Ed 3

Oracle Database 12c: Administration Workshop Ed 2

Oracle Database: Develop PL/SQL Program Units

Oracle Database: Develop PL/SQL Program Units Ed 2

Course Objectives

Enumerate Oracle auditing solutions to monitor database security requirements

Implement Oracle Audit Vault and Database Firewall

Configure Oracle Audit Vault and Database Firewall

Explain Oracle Compliance Framework

Configure basic Compliance Framework rules

Course Topics

Introduction

Course Objectives and Schedule

Course Practices and Additional Information

Using Unified Audit

Auditing Overview

Unified Audit Management

Specific Audit Situations

Using Fine-Grained Audit

Comparison with Unified Auditing

Overview

FGA Implementation

Introduction to Oracle Audit Vault and Database Firewall (AVDF)

Oracle Audit Vault and Database Firewall Features

Oracle Audit Vault and Database Firewall Components

Oracle Audit Vault and Database Firewall Architecture

Supported Secured Targets

Integrating Oracle AVDF with Third-party Products

Oracle AVDF Administrator Tasks

Oracle AVDF Auditor Tasks

Planning the Oracle Audit Vault and Database Firewall Implementation

Evaluating Oracle AVDF Configuration Requirements

Configuring Oracle AVDF and Deploying the Audit Vault Agent

Configuring Oracle AVDF and Deploying the Database Firewall

Installing the Audit Vault Server

Requirements for Installation of Oracle AVDF

Network Interface Card Requirements

Installing an Audit Vault Server

Performing Audit Vault Server Post-Installation Tasks

Configuring the Audit Vault Server

Specifying the Server Date and Time

Setting or Changing the Audit Vault Server Network Settings

Configuring or Changing the Audit Vault Server Service

Configuring the Audit Vault Server Syslog Destinations

Defining Datafile Archiving Locations

Creating Archiving Policies

Configuring the Email Notification Service

Configuring Administrative Accounts for the Audit Vault Server

Configuring Oracle AVDF and Deploying the Audit Vault Agent

Understanding Network Requirements for AV Server and AV Agent

Registering Hosts in the Audit Vault Server

Deploying and Activating the Audit Vault Agent on Host Computers

Registering the Audit Vault Agent as a Windows Service

Creating User Accounts for Oracle AVDF

Registering Secured Targets

Configuring Audit Trails for Secured Targets

Configuring Stored Procedure Auditing

Networking and Oracle AVDF

Overview of the OSI 7-level Network Model

Overview of IPv4 Addressing and Routing

Overview of MAC Addressing

Overview of Virtual LANs (VLANs)

Overview of Spanning Tree Protocol (STP)

Oracle AVDF Deployment Models (inline, out of band, and proxy)

Best Practices for Database Policy Enforcement (DPE) and Database Activity Monitoring (DAM) Modes

Installing a Database Firewall

Requirements for Installation of a Database Firewall

Network Interface Card (NIC) Requirements

Installing a Database Firewall

Performing Database Firewall Post-Installation Tasks

Configuring Oracle AVDF and Deploying Database Firewall

Configuring Basic Settings for Database Firewall

Configuring a Database Firewall on Your Network

- Associating a Database Firewall with the Audit Vault Server
- Registering Secured Targets
- Configuring Enforcement Points
- Configuring and Using Database Interrogation
- Configuring and Using Database Response Monitoring

Using Host Monitoring

- Overview of Host Monitoring
- Installing and Enabling Host Monitoring
- Checking the Status of the Host Monitor
- Stopping the Host Monitor

Configuring High Availability

- Overview of Oracle AVDF High Availability Architecture (resilient pairs)
- Configuring a Resilient Pair of Audit Vault Servers
- Configuring a Resilient Pair of Database Firewalls

Creating Custom Collection Plug-ins

- Overview of Audit Collection Plug-ins
- General Procedure for Writing Audit Collection Plug-ins
- Setting Up Your Development Environment (downloading the SDK)
- Creating Audit Collection Plug-ins
- Packaging Audit Collection Plug-ins

Managing the Audit Vault Server

- Starting an Archive Job
- Restoring Audit Data
- Monitoring Jobs

Managing the Database Firewalls

- Viewing and Capturing Network Traffic in a Database Firewall
- Viewing the Status and Diagnostics Report for a Database Firewall
- Removing a Database Firewall from the Audit Vault Server

Overview of the Auditing and Reporting Features

- Overview of Database Firewall Policies
- Overview of Oracle Database Audit Policies
- Overview of Reports and Report Schedules
- Overview of Oracle Database Entitlement Auditing
- Overview of Oracle Database Stored Procedure Auditing
- Overview of Alerts and Email Notifications

Performing Administrative Tasks

- Viewing a List of Audit Trails and Audit Trail Status
- Viewing a List of Enforcement Points and Enforcement Point Status
- Specifying a Data Retention Policy
- Creating Secured Target Groups
- Assigning a Secured Target to a Compliance Group
- Managing User Accounts and Access
- Creating Templates and Distribution Lists for Email Notifications
- Monitoring Jobs

Creating Audit Policies for Oracle Databases

Overview of Audit Policies and Audit Data Collection

Overview of Oracle Database Auditing

Recommended Audit Settings

Creating Audit Policies for Oracle Database (overview)

Retrieving and Modifying Audit Settings from an Oracle Database

Creating Additional Audit Policy Settings for an Oracle Database

Creating Database Firewall Policies

Overview of Database Firewall Policies

Creating a Firewall Policy

Defining Firewall Policy Rules and Settings

Using Profiles to Customize a Firewall Policy

Publishing Firewall Policies

Deploying Firewall Policies to Secured Targets

Oracle AVDF Reports

Using the Built-in Reports

Managing Reports

Customizing Built-in Reports

Creating Custom Reports

Managing Entitlements

Overview of Entitlement Data (what is it?)

Retrieving Entitlement Data from an Oracle Database (creating a snapshot)

Creating Labels for Snapshots

Assigning Labels to Snapshots

Using Entitlement Reports
