

Access Your Oracle Certification Records With Ease

Whether you have never taken an Oracle exam or you took one many years ago, follow these **two simple steps** to ensure that you have easy access to certification records (including exam scores), and that all your records are in one place.

STEP 1 – Create or Update Your Pearson VUE Account.

A Go to pearsonvue.com/oracle

B Select your case:

I have never taken an Oracle Certification exam, or an exam at Pearson VUE.

Select Create Account and enter the information to create your account.

I am accessing my Oracle Certification exam as part of my Oracle Cloud Learning Subscription.

Select Create Account and enter the information to create your account.

I have never taken an Oracle Certification exam but I have taken an exam with another certification program at Pearson VUE.

Sign in and select the option 'see exams for a different testing program' and select Oracle Certification Program.

STEP 2 – Authenticate Your CertView Account.

A Go to certview.oracle.com

B Select FirstTime User and sign in with your Oracle Web Account username and password.

- ▲ If you don't have an Oracle Web Account username and password, select the option to create one on this page.
- ▲ If you cannot remember your Oracle Web Account username and password, follow instructions on this page.

C Provide the Oracle Testing ID and email address from Pearson VUE profile.

- ▲ You must wait at least one hour after creating your Pearson VUE profile.
- ▲ If you are having trouble authenticating, once authentication has failed 3 times, your account will be referred for manual authentication. You will receive confirmation of manual authentication in 1 business day.
