

Oracle Cloud Infrastructure Ravello Service Fundamentals

Duration: 1 Day

What you will learn

In this course, learn about the Oracle Cloud Infrastructure Ravello Service, the defining technology and features that will enable you to move your on premise virtual machine based applications to public cloud.

Learn to create and deploy your application to the cloud. Also learn to perform essential administrative tasks within Oracle Cloud Infrastructure Ravello Service.

Related Training

Required Prerequisites

Should have experience with KVM and VMWare based VMs

Course Objectives

Describe Oracle Cloud Infrastructure Ravello Service

Describe the technologies of Oracle Cloud Infrastructure Ravello Service

Identify business situations that can use Oracle Cloud Infrastructure Ravello Service

Create a simple application with Oracle Ravello Service

Upload a VM to Oracle Cloud Infrastructure Ravello Service

Manage Ravello applications

Course Topics

Oracle Cloud Infrastructure Ravello Service Overview

What Is Oracle Cloud Infrastructure Ravello Service?

What Is an Application?

Features of Oracle Cloud Infrastructure Ravello Service

The Oracle Ravello Management Service

Oracle Cloud Infrastructure Ravello Service Features and Technology

Oracle Cloud Infrastructure Ravello Service Technology

What Is HVX?

Nested Hypervisor and Virtual Machine Manager

What Is the Added Value of Using Ravello API?

Oracle Cloud Infrastructure Ravello Service Use Cases

Ravello Well-Suited for VMware and KVM Workloads

Business Scenarios for Ravello

Accessing Oracle Cloud Infrastructure Ravello Service

Oracle Cloud Infrastructure Ravello Service Subscription

Oracle Cloud Infrastructure Ravello Service Console Interface

Create an Application

Creating and Deploying Ravello Applications to Cloud

Assessing Your Deployment Scenario

Import Virtual Machines (VMs) or Disk Images

Work Flow in Creating an Application with a VM

Blueprint

Administering Oracle Cloud Infrastructure Ravello Service

Managing Ravello Applications

Sharing Library Items

Managing Users

Ephemeral Access

Monitoring Budget and Billing
