Introduction to Oracle Financial Analyzer Self-Study Course

Duration: 0 Days

What you will learn

Oracle University Self-Study CD Courses are a great accompaniment and reliable alternative to our inClass courses, and provide an excellent ongoing resource for reviewing key concepts and practicing skills.

This course introduces participants to the interface and functionality of an Oracle Financial Analyzer budget workstation. Participants will use both predefined and custom Financial Analyzer structures for financial reporting and budgeting. Participants will learn to use the web components of Oracle Financial Analyzer. Participants will also examine the role played by a Financial Analyzer budget workstation within a distributed environment.

Audience

Database Designers
End Users

Related Training
