

R12.x Oracle iProcurement Fundamentals

Duration: 3 Days

What you will learn

This course will be applicable for customers who have implemented Oracle E-Business Suite Release 12 or Oracle E-Business Suite 12.1.

The course provides a thorough explanation of the functionality of Oracle iProcurement. It includes training for both end users and administrators.

End users learn how to use the shopping process to create requisitions. They also learn how to use the desktop receiving functionality to receive items and process any corrections or returns.

Administrators learn how to analyze information to plan their iProcurement stores. The course includes instructions on setting up local stores.

Learning is accomplished through a series of presentations followed by demonstrations and practices.

Learn To:

Create requisitions in iProcurement

Receive items

Create and manage stores

Create punch-outs to supplier-hosted catalogs

Create customized forms

Set up iProcurement

Related Training
