

MySQL Advanced Stored Procedures

Duration: 2 Days

What you will learn

This MySQL Advanced Stored Procedures training teaches you how to improve the quality of Stored Procedures, Function and Triggers in your applications. You'll learn how to debug and optimize them.

Students Who Can Benefit from this Course

Database developers and administrators who want to improve the quality of their applications by creating complex logic within the database itself using stored procedures.

Participate in Hands-On Labs

Through a hands-on approach, this instructor-led course focuses on labs that are designed to teach you how to maximize the use of stored procedures. You'll develop the knowledge to know whether or not an application should contain stored procedures.
