

OPN Only Oracle ECM 10g R3 Implementation Boot Camp

Duration: 3 Days

What you will learn

Oracle offers the most unified, usable Enterprise Content Management (ECM) platform in today's market. With centralized control across single or multiple repositories, common core functionality, and easily scalable content management capabilities, Oracle provides content management solutions for many content types and users-wherever they work in the enterprise.

The ECM Implementation Boot Camp is a three-day hands-on workshop, designed for users who are new to ECM and will provide implementation instruction on the ECM technology offered by Oracle.

Audience

Project Manager

Technical Consultant

Prerequisites

Required Prerequisites

Participants should have foundational/basic understanding of Enterprise Content Management.

Course Objectives

Introduce Oracle ECM

Introduce Oracle Content Server and Document Management
