

Merchandise Operations Management (MOM) Overview

Durée: 2 Jours

Description

This course highlights the place of the MOM product suite in the Oracle Retail solution footprint and illustrates the flow of data between the different applications. At the end of this course, the participants will be able to provide an overview of the MOM product suite and identify where the MOM product suite fits in the Oracle Retail solution footprint.

Learn to:

Use business process diagrams to examine how the applications integrate and work with each other

Apply knowledge from this course to other MOM applications and training courses

Audience

Analystes
Business Analysts
End Users
